

Homework: Writing Ionic Compound Formulas

Please write the formulas of the following ionic compounds. Remember to pay special attention to the compounds with Roman numerals in the names!

- 1) sodium sulfide _____
- 2) iron (III) nitrate _____
- 3) aluminum fluoride _____
- 4) nickel (III) cyanide _____
- 5) calcium nitride _____
- 6) silver phosphate _____
- 7) tin (II) sulfite _____
- 8) potassium oxide _____
- 9) copper (I) bromide _____
- 10) magnesium acetate _____
- 11) cobalt (II) telluride _____
- 12) gallium nitrite _____
- 13) vanadium (V) iodide _____
- 14) lithium fluoride _____
- 15) zinc sulfate _____
